

MEETING PROGRAM GUIDE

#5: ENTREPRENEURSHIP

01 BEFORE THE MEETING

Officers should identify necessary tools to complete the entrepreneurship workshop.

INTRODUCTION 02

This meeting will focus on the fourth YLA pillar: **entrepreneurship**. Members will develop entrepreneurial skills through innovation, organization, planning, and execution.

03 ENTREPRENEURSHIP WORKSHOP

- Brainstorming in groups: identify needs within your school. Does your school lack a food pantry? Could students benefit from free hygienic products placed in the bathrooms? Does your school have any organizational or financial needs?
- How will your chapter address this need? Which school officials should be involved with the organization of your project?
- Does your project require fundraising? Your chapter could raise funds for the project by hosting a bake sale, 5k run, or talking to local philanthropists.
- What planning will the project require? How long will it take to execute the project?
- Each group should pitch their idea to the entire chapter. The chapter will vote on which idea they would like to execute. The entire chapter will work together to better their school through this project.

CONCLUSION 04

This workshop has generated many ideas for your YLA Chapter to better their school. Although this program will only select one project to execute, keep every idea in mind to inspire the chapter for upcoming projects.
